Work Experience

Web Designer at BrandSystems Pvt Ltd Bangalore (Sep 2021 - May 2026)

- Spearheaded enterprise frontend architecture using React, establishing UI standards across multiple product lines
- Developed responsive MJML email templates to ensure consistent cross-client branding and communication workflows
- Integrated AI-driven workflows and optimized cross-browser web performance to ensure seamless user experiences
- Collaborated in Agile sprints, mentoring junior developers and streamlining CI/CD pipelines for rapid deployments.

Software Engineer at Sparshik Technologies Bangalore (Oct 2017 - Jan 2021)

- Maintained large-scale WordPress applications, executing advanced UI customizations to reduce load times by 25%
- Integrated Face API and HTML5 Canvas API within JavaScript frontend architectures to build interactive features
- Single-handedly maintained a multilingual Dubai Expo campaign website (English, Arabic, Spanish, German, Chinese).

Software Engineer at Pixel Mavericks Bangalore (Nov 2014 - Oct 2017)

- Engineered responsive custom UI components within WordPress, optimizing performance to boost engagement by 25%
- Developed interactive digital magazines utilizing Adobe DPS to deliver seamless cross-device user experiences.

Projects

Brand Asset & Artwork Management Platform (Oct 2024 - May 2026)

- Built a React, shadcn/ui, and Tailwind CSS asset platform with advanced previews to streamline content discovery
- Integrated approval workflows and secure resource pipelines to accelerate marketing deployments

Asset Library (Sep 2021 - May 2026)

- Engineered a high-performance HTML, JavaScript, and Tailwind CSS asset interface with real-time search and optimized data grids
- Designed a responsive architecture to streamline media metadata processing and ensure a superior cross-device experience

Admin Settings (Dec 2024 - Sep 2025)

- Developed an enterprise admin configuration module using HTML, JavaScript, and Tailwind CSS to streamline application management
- Engineered a responsive interface with flexible layouts and dynamic content sections to customize dashboard workflows
- Optimized frontend rendering and controls to boost operational efficiency by 30% and reduce administrative overhead

Business Card Builder (Jun 2024 - May 2026)

- Developed a responsive digital business card platform using HTML, JavaScript, and Tailwind CSS to modernize professional networking
- Developed a dynamic interface with real-time live preview functionality to let users instantly customize digital assets
- Implemented modular layouts and comprehensive styling controls to ensure pixel-perfect, cross-device compatibility

Enterprise Web Platforms & E-Commerce (Oct 2017 - Jan 2021)

- Developed and maintained WordPress frontend applications and UI architectures for enterprise clients like Almarai, Kaya Skin Clinic, and PepPlay
- Optimized core web vitals and responsiveness to deliver seamless digital experiences for high-traffic platforms

Digital Asset Management System (Feb 2025 - May 2026)

- Developed a scalable Digital Asset Management platform using Tailwind CSS, shadcn/ui, React and Redux to centralize enterprise content operations
- Implemented dynamic approval workflows to automate media pipelines and boost operational efficiency by 30%.

Media Annotation & Review Platform (Apr 2024 - Dec 2024)

- Architected a Tailwind CSS media annotation platform with real-time comments and multi-format review tools for PDF, image, and video files
- Built responsive user interfaces and robust workflows to accelerate team reviews and optimize collaborative efficiency.

Global Tourism Campaign Platform (Dec 2017 - Aug 2020)

- Developed a responsive virtual tourism platform for the Abu Dhabi Department of Culture and Tourism
- Architected a scalable multilingual interface with RTL support and 360-degree interactive tours

Education

Rajeev Institute of Technology, Hassan (2013)

Graduate in Information Science
